

Re-Coiler (Flat)

Features and Benefits:

The DRTS Re-coiler is designed to give manufacturers the ability to re-coil unfinished coils or create short coils from a larger coil. This machine reduces your scrap rates by allowing you to utilize the good sections of a produced coil which would normally be scrapped.

- ❑ PLC Control Unit: SIEMENS S 7200
- ❑ Coiling: Single Station
- ❑ Touch Panel: Siemens 4,2"
- ❑ Motor for Coiling: 0,75kW
- ❑ Drivers: LENZE 8400
- ❑ Coiling Speed: Average 200m/min
- ❑ Torque Control: Digitally controlled break and disk system to keep always same torque during winding period.
- ❑ Dancer: Included
- ❑ Coil Width: Adjustable
- ❑ Low Tension Adjustment: Available
- ❑ Digital Length of Coil
- ❑ Servo Motor Travers Control System
- ❑ Mobile and Easy to move around
